

# Clinical Trial Match Report

## Patient ID: PAT\_0001

### Acetylcholine Iontophoresis As A New Challenge With Type 2 Diabetic Peripheral Neuropathy: A Possible New Therapy (NCT06219590)

Eligible	Score
True	0.5820

**Reasoning:**

**Evaluated Criteria:**

Inclusion: 2 rules

Exclusion: 4 rules

### UCMSCs Combined With Standard Therapy for the Treatment of Newly Diagnosed Type 1 Diabetes (NCT06407297)

Eligible	Score
True	0.5726

**Reasoning:**

**Evaluated Criteria:**

Inclusion: 6 rules

Exclusion: 11 rules

### China Diabetes Type 1 Study (CD1S) by China Alliance for Type 1 Diabetes (NCT05498974)

Eligible	Score
True	0.5675

**Reasoning:**

**Evaluated Criteria:**

Inclusion: 5 rules

Exclusion: 3 rules

## Combined Effects of Foot-Ankle Therapeutic Exercises and Mindful Walking in Patients With Diabetic Polyneuropathy (NCT07248631)

Eligible	Score
True	0.5619

### Reasoning:

#### Evaluated Criteria:

Inclusion: 7 rules

Exclusion: 8 rules

## Transcutaneous Electrical Stimulation and Controlled Heat in People With and Without Diabetes (NCT07063524)

Eligible	Score
False	0.5363

### Reasoning:

- Reasoning Engine Veto: Diagnosed neuropathy

#### Evaluated Criteria:

Inclusion: 3 rules

Exclusion: 18 rules
